CONSUMPTION CAN BE CURED.—
Dr. HASTINGS'S COMPOUND SYRUP OF NAPHTHA—The wonder and doubt felt by the medical faculty when Dr. Hastings proclaimed the curability of pulmonary consumption by the use of Naphtha as a remedial agent, has now, after eight years of trial, settled down into a deep conviction that there are few or no cases in which consump-tion cannot be cured by Dr. HASTINGS'S COMPOUND SYRUP OF NAPHTHA. In every case in which it has been tried in England or the United States it has been folowed by immediate relief and ultimate cure. In the Blenhem Free Dispensary, under the charge of Dr. Hastings during five years that the Naphtha has been in use, there has not been a single death from disease of the lungs, while previously patients had died almost every week. In incipi-ent stages of consumption the effect of the Naphtha Syrup is almost miraculous, and a cure effected in an incredibly short space of time. In the more advanced stages, and even in the third or last dreadful division of this hitherto lacurable disease its effect is equally wonderful. This period is marked by the expectoration of the tuberclessic cheeselike particles mixed with pus, mucus, blood, etc., and most generally accompanied with severe diarrhea. On admin-istering the Naphtha Syrap the formation of the tubercles is almost instantly arrested, the foreign matter thrown off, the tubercles already formed are destroyed, and the breathies immediately becomes easier, and the patient on the third night, after first taking the Syrup, is often able to enjoy a quiet night's rest, a thing unknown for weeks previ-
